VAIBHAVI KULKARNI

+91 75179 76019 | vaiibhaviikulkarnii@gmail.com | linkedin.com/in/vaibhavi-kulkarni-vaik

PROFESSIONAL SUMMARY

Results-driven MCA student with hands-on experience in full-stack web development, data analytics, and DevOps practices. Currently advancing expertise in data engineering with a focus on building scalable data pipelines and implementing modern data architecture solutions. Proficient in Python, ReactJS, SQL, and cloud technologies with demonstrated ability to deliver end-to-end technical solutions. Active hackathon participant with proven problem-solving capabilities.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, HTML5, CSS3

Web Development: ReactJS, Bootstrap, Git, Vercel, Firebase (Authentication, Firestore, Realtime Database)

Database Management: MySQL, Firebase, Database Design, Query Optimization

Data Engineering (Learning Path): Data Pipeline Development, ETL/ELT Processes, Data Warehousing Concepts, Data Modeling, Apache Spark (Fundamentals), Airflow (Workflow Orchestration)

DevOps & CI/CD: Docker, Jenkins, Kubernetes, SonarQube, Nexus, CI/CD Pipeline Implementation

Data Analytics & Visualization: Data Analysis, Data Visualization Tools, Statistical Analysis, Dashboard Development

Project Management & Collaboration: Agile Methodologies, Scrum Framework, JIRA, Team Collaboration, Version Control (Git)

PROFESSIONAL EXPERIENCE

Data Analytics Intern | IBM SkillsBuild

June 2024 – August 2024

- Performed comprehensive data analysis to extract actionable insights from complex datasets
- Developed data-driven reports and visualizations to support business decision-making
- Applied statistical methods and analytical techniques to identify trends and patterns

Data Visualization Intern | IBM SkillsBuild

December 2023 – January 2024

- Created interactive dashboards and visual analytics using AI-powered tools
- Transformed raw data into compelling visual narratives for stakeholder presentations
- Leveraged AI tools to enhance data visualization efficiency and effectiveness

TECHNICAL PROJECTS

RandomlyRight | ReactJS, Firebase, Vercel, Git, Bootstrap

- Architected and deployed a full-stack web application providing anonymous advice platform with real-time capabilities
- Implemented user authentication, real-time data handling, and responsive design using Firebase backend
- Established CI/CD pipeline using Docker, Jenkins, Kubernetes, SonarQube, and Nexus for automated deployment

BillCraftr | ReactJS, Firebase, Vercel, Git, Bootstrap

- Developed web-based invoice generation tool enabling businesses to create professional, customized invoices
- Designed intuitive user interface with form validation and data persistence using Firebase
- Implemented responsive design ensuring cross-device compatibility and optimal user experience

Stock Analysis Dashboard | Python, ReactJS, SQL, Git

Ongoing

- Developing an interactive data-driven web application for historical stock data analysis and visualization

- Implementing customizable dashboards allowing users to select datasets, metrics, and visualization types
- Building backend data processing pipelines to handle financial data extraction and transformation

EDUCATION

Master of Computer Applications (MCA)

MES Institute of Management and Career Courses | 2024 – 2026

Bachelor of Business Administration - Computer Applications (BBA-CA)

St. Mira's College for Girls | 2021 – 2024

PROFESSIONAL CERTIFICATIONS & ACHIEVEMENTS

- **Coursera:** Professional Data Science Course
- **IBM:** Project Management Fundamentals, Web Development Fundamentals, Getting Started with Artificial Intelligence, Artificial Intelligence Fundamentals
- **Edureka:** Salesforce Administrator and App Builder Certification, Salesforce Platform Developer 1 Certification
- **DYDPU Hackathon 2025 Participant:** Collaborated in 30+ hour team-based technical competition, developing innovative solutions under time constraints
